These days, technologies become an integral part of the daily lives of people. Evolvement and development of new technology exponentially increased over the past few decades. Smart phones become one of the central technologies of the 21st century due to widespread usage of cell phones for business, communication, and information. These days, smart phones have become an integral part of people's lives. Almost every cell-phone users are using the third or fourth generation smart phones. As the technology evolved exponentially over the past years, also many smart phone applications were developed.

**GPS AND MAPS**

Most smartphones now are equipped with Global positional system (GPS). This technology allows people to locate address and areas all around the world. There are also many great navigation apps that will help you find locations with ease. No matter if you are a driver or a pedestrian you will get directions.

**THE MANY USES OF SMARTPHONES**

No list can offer a comprehensive roster of all conceivable uses for a smartphone. But there are many key ways that most people use their devices to stay connected to others, access entertainment resources, stay safe, find out how to get somewhere, and more.

Here is a short summary of the most common ways consumers use their smartphones:

- Location Assistance: If you need directions or want to know where you are when lost, simple apps can help you. Most location-assistance functions are either included with a standard phone or are something you can easily download and use when you need.

- Financial Transactions: Do you need to pay a bill or receive money via one of the many online pay sites? Use your phone and complete the transaction in a few minutes. You can even check bank balances, move money from one account to another, and pay your taxes on your smartphone.
- News Sources: Want to know the latest in sports, news, weather, or any other current event? A smartphone is the fastest, most efficient way to find out no matter where you are. That's because the phone is actually a small computer with an internet connection.
- Social Life Enhancer: If you like to keep up with what your friends are doing and saying, social media apps on your phone will keep you in touch 24/7.
- Shopping Tool: One of the newest ways that phones have become an essential part of life is as a shopping tool. You can browse, shop, compare prices, and buy just about anything you need.
- Library: There's no need to carry books with you because you can store e-books in your smartphone or read any number of free books online. Every smartphone is a virtual library.
- Photography Tool: You can use a phone to take a picture of anything, whether it's a beautiful nature scene or a car wreck you need to validate for your insurance company.
- Buying Tickets and Booking Travel: Whatever the event or trip, you can purchase tickets and book hotels, get rental cars, and reserve a place at your favorite restaurant on your smartphone.
- Security Device: You can call the police, alert friends of your whereabouts, record audio of whatever is going on around you, or set off a very loud audio alarm with your smartphone.
